

SF4

SCHUBERTH

ONE LEGENDARY SHAPE 20 YEARS EVOLUTION

FULL CARBON SHELL

Light weight, hand laid carbon, autoclave cured shell.

12 VENTILATION CHANNELS ON THE SHELL

Optimum circulation is achieved through aerodynamic design and air flow channels built into the EPS, which provide the ideal flow for intake of cool air and exhaust for hot air.

In open air the helmet feeds 14 liters of fresh air per second at 100 km/h.

3 MM THICK VISOR 3D INJECTED

Injected visor directly derived from F1 expertise.

Twelve different visors available from transparent to dark with several mirroring and multi-layer mirroring coating options.

All standard visors are Pinlock® 120 lens equipped for optimum fog resistant performance. Tear-off buttons are also installed.

VISOR LOCK SYSTEM

Two-stage visor lock is directly derived from F1 expertise. The visor always closes symmetrically and therefore securely.
